NOW, LET YOUR GAME PICK YOUR SKATES.

Players can now choose their skates based on which one best matches their on-ice performance.

POWERFUL

QUICK

FIND YOUR PERFECT FIT / Bauer has evolved the skate-fitting process into a 3-Dimensional fit system. Data from 800,000 player foot scans allowed us to create three fit profiles for both Supreme and Vapor. After their feet are scanned, players will know which fit they should use to maximize performance.

FIT 1

FIT 2

FIT 3

CUSTOMIZE YOUR PERFORMANCE / Personalize your skating performance with dozens of profile and sharpening combinations. Create the perfect skate for your individual performance.

LET'S TALK FIT WITH PRO-FORMANCE ADVANTAGE.

Your personal best starts with personal service. Our custom fitting system is the best way to find what fits your game, while increasing your comfort, safety, and power on the ice. Visit us in-store to get the full Pro-Formance Advantage experience.

WE LOOK AT 6 WAYS YOU PLAY:

1. LEVEL & FREQUENCY OF PLAY

To find you skates that fit your game, we want to know your level of play and how often you're on the ice. Our Source Exclusive skates not only range depending on what you're looking to get out of them, they also accommodate all budgets.

2. FOOT ANALYSIS

We know no foot is exactly the same and that's why we start every fitting with a foot analysis, determining any concerns you might have. We concentrate on the dimensions of your foot: forefoot width, instep height, arch shape, and heel contours. We also look out for any foot deficiencies, prior injuries, and more importantly the pronation or supination of your foot. This alone dramatically affects the fit of your skate.

3. FOOT-TO-SKATE COMPATIBILITY

Every skate fits differently and not all skates are best suited for your foot size and shape. Using our knowledge of your feet, we then select skates that best match your foot. We help you ensure a proper fit for your complete satisfaction.

4. CUSTOM HEAT MOLDING

The best way to deliver the most customized fit is by using skate ovens. By heating your skates, the inside padding and liner mold to the shape of your foot, delivering a truly custom fit. This helps address any fit issues such as tightening or pinching.

5. GAIT ANALYSIS

Once the ideal skate has been selected and molded, it's time to evaluate the skate fit and your stability inside the skate. We want to know, "Is your foot properly supported inside the skate?" We answer this through a stationary body evaluation and Gait Analysis.

6. FOOT SUPPORT

We enhance the fit and performance of your skate with the use of Superfeet Carbon Pro Hockey Footbed. Footbeds help alleviate fit issues such as pronation, supination, heel lift, reduced circulation, pump bumps, and other ailments skaters are susceptible to. Combined with a proper fitting skate sock, you'll feel the difference on the ice.
